**DETAILED ACTION**

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

***Claim Objections***

Claims 4-8 and 10-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim shall not serve as a basis for any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-8 and 10-12 have not been further treated on the merits.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Leasure et al (US 6,782,863 B2). Claims embrace at least the recoil starter embodiment shown in Figure 10, which includes a rope pulley 86, an engaging element 90 with a sleeve portion, and a spring coupling element 88.

Art Unit: 3747

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tohyama (US 2003/0213455 A1) and Kawasaki et al (US 6,588,390 B2) disclose recoil starters having a spring coupling element between a rope pulley and an engine engaging element.
